### Donner Lake Triathlon

July 9, 2008

Dear Athlete,

As many of you are aware, there are several fires burning throughout Northern California. This includes two new fires in relatively close proximity to the Truckee region where our annual Donner Lake Triathlon takes place. Many of you have contacted us inquiring if the triathlon will take place. The air has cleared up considerably in the last two days and we will be moving forward with producing the event this Sunday.

We will continue to closely monitor the air quality as the event approaches, as we would never want to place any of our athletes in an unsafe situation. However, it appears as though Mother Nature has decided to cooperate with us.

The lifeguard staff at the beach said yesterday was much better than past days and they seem to have a good visual of the entire lake. This morning, the air is even better. Air quality appears to be at its best in the morning and at its worst in the late afternoon/early evening. This is fortunate as our event occurs in the morning.

We would thank everyone for their patience, concerns and as always, welcome your feedback. You may email us at [info@changeofpace.com](mailto:info@changeofpace.com).

We will continue to post all race updates on our website at [http://changeofpace.com/Donner\\_lake\\_tri.html](http://changeofpace.com/Donner_lake_tri.html). In addition, we will send you another e-mail with packet pick up info, etc. tomorrow.

Sincerely,

Dave Miramontes  
Race Director  
A Change of Pace
